Digidesign SCSI|128/ATTO EPCI-UL3D

SCSI Host Bus Adapter Support Files

The SCSI128/ATTO UL3D Support installer includes a number of files required to use either the Digidesign SCSI|128 or ATTO EPCI-UL3D SCSI Host Bus Adapter cards with Pro Tools 6.0. If you have either of these cards installed in your system, you must run the SCSI128/ATTO UL3D Support installer. Without this software, you will experience crashes and data loss.

You should not install this software if you do not have either the Digidesign SCSI|128 or ATTO EPCI-UL3D SCSI Host Bus Adapter card installed in your system.

To install:

1 If it is not already installed, install Pro Tools 6.0.

2 Quit Pro Tools and all other open applications.

3 Double-click the SCSI128/ATTO UL3D Support installer. You must be an administrator to install this software.

4 If prompted to replace existing files, click OK.

5 When installation is complete, restart your computer.
